Dear «Title» «Surname»

The RATPAC Trial of Rapid Blood Testing for Acute Chest Pain

You may remember that when you visited the Accident and Emergency Department at «Site_name» three months ago you kindly agreed to take part in this research study. Thank you for your help with this research so far.

This is the final part of the research. We would be grateful if you could complete the enclosed questionnaire. It is a follow-up questionnaire, and is similar to the original one you may have returned, but shorter. It should take about fifteen minutes.

Your responses will be kept confidential and will only be seen by the research team.

Please send this back to the Medical Care Research Unit at the University of Sheffield, using the enclosed envelope (no stamp is required).

If you need any help completing this questionnaire or have any questions about the research, please contact me using the details above.

We will not be sending you any further questionnaires or contacting you again after you return this questionnaire. If you would like to find out about the results of the study (available in 2009), please contact me using the details above.

Many thanks.
Yours sincerely

Liz Cross
RATPAC Trial Manager
