NIHR Collaborative Leadership in Applied Health Research and Care for South Yorkshire: Engagement with the NHS and Social Care Services

Professor Sue Mawson
Director

Jo Cooke
Programme manager

NIHR CLAIRC
for South Yorkshire

Aims of presentation:

NHS
National Institute for
Health Research

1. Give a brief over view of the CLAIRC SY model
2. Give a brief over view of the ScHARR lead CLAIRC SY activity
3. Provide evidence of engagement with the NHS and social services.
4. Describe how CLAIRC principles facilitate engagement
5. Suggest reasons why CLAIRC is a successful collaboration with the NHS and Social Care services.

Health Research

Evidence of engagement.

- Long term depression - IQUESTS project with strong user input into NHS service redesign
- Stroke work - research and innovation work across the care pathway. Strong links to the North Trent Stroke Project Strategy Board
- TaCT - Special Interest group for tele health (SIG) PCT and Social Services
- Obesity - cohort with nested studies, collaborative scoping of needs with obesity commissioning leads for 4 PCTs
- Inequalities in Health - identifying areas of work through consensus which reflect the public health priorities of NHS and academic partners.

Facilitating engagement through the CLAHR Core Principles:

NHS
National Institute for
Health Research

"more than the sum of the parts"

- ▲ Build collaborations through co-production
- ▲ Address health inequalities
- ▲ Build capacity across SY
- ▲ Enable joint engagement in and ownership of CLAHR by our partners

NIHR CLAHR
for South Yorkshire

Working together to share knowledge.

NHS
National Institute for
Health Research

- CLAHR learning events
- Disseminating findings/
looking for impact two way
street
- Business and innovation
network (B in R&D)
 - Potential joint projects to
support sustainability,
Regional Innovation Funds,
SDO.

QIPP

NHS
National Institute for
Health Research

- It is recognised that the economic climate going forward will be difficult and more challenging than recent experience. The SHA required all PCTs to set out the work they plan to undertake to meet this financial challenge within the framework of Quality, Innovation Productivity and Prevention (QIPP).
- www.calderdale.nhs.uk/_/11.3 - Medium Term Financial Plan - QIPP Plan

Successful Engagement

NHS
National Institute for
Health Research

- Match funding model
 - Lomas J. 2007. BMJ
- Implementation
 - Cooksey Review 2008
- Joint strategic objectives
 - SHA QIPP, NHS Health Ambitions
- Core principles
 - co- production, engagement, building capacity.
- Distributed model of Leadership
 - NHS/Academic, theme leads 'boundary spanners'
- Integrated model of delivery.
 - Project managers NHS/academic
 - Facilitators NHS/ academic
