#MUPlocal

Minimum Unit Pricing (MUP)

Exploring the impact of the local implementation of a
minimum price for a unit of alcohol

- the evidence for

Northumberland

Setting the Scene

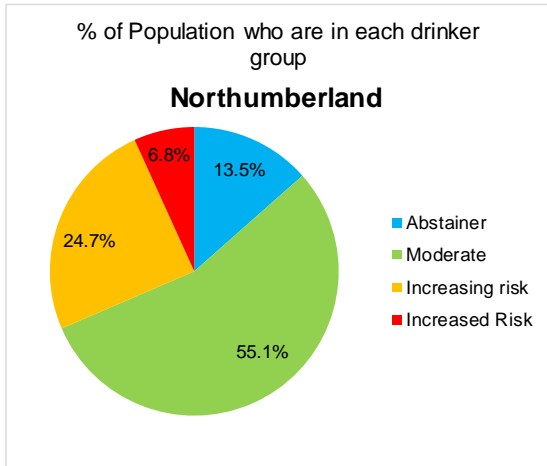

The scale of the local problem

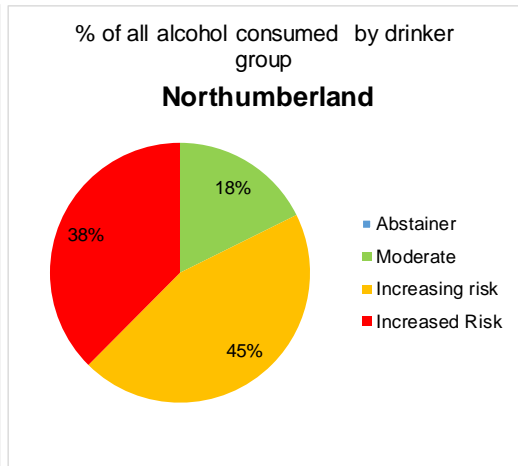

Northumberland

In Northumberland

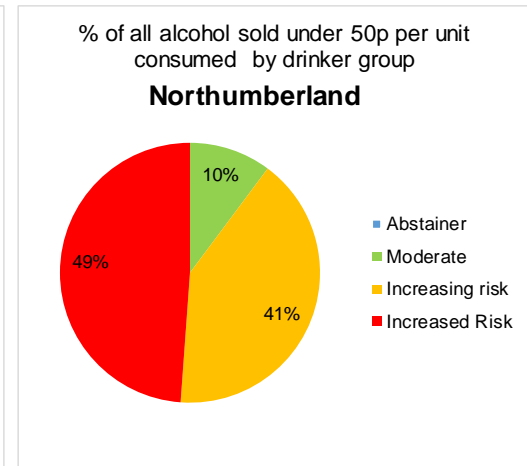

6.8% of people drink at high risk levels

They drink **38%** of all alcohol

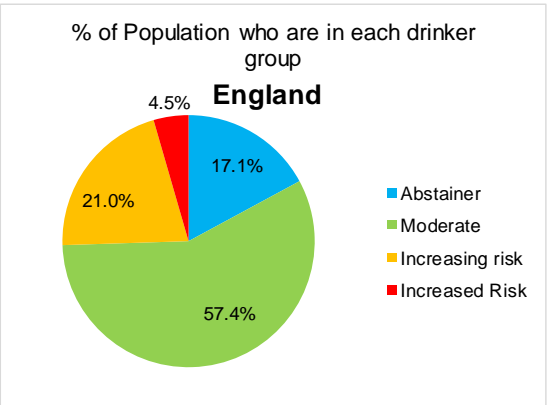

They drink **49%** of the cheap alcohol sold below 50p per unit

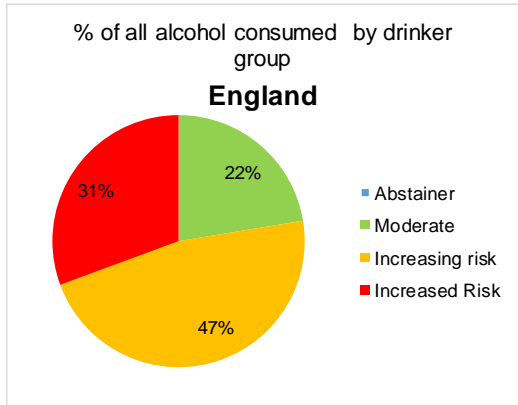

% of Population who are in each drinker group

England

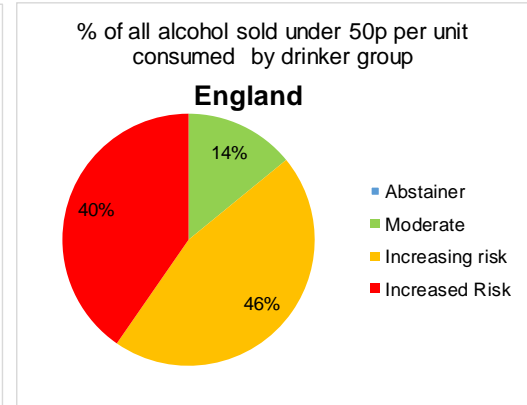

% of all alcohol consumed by drinker group

England

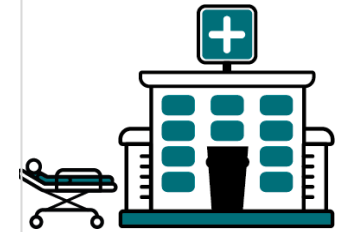

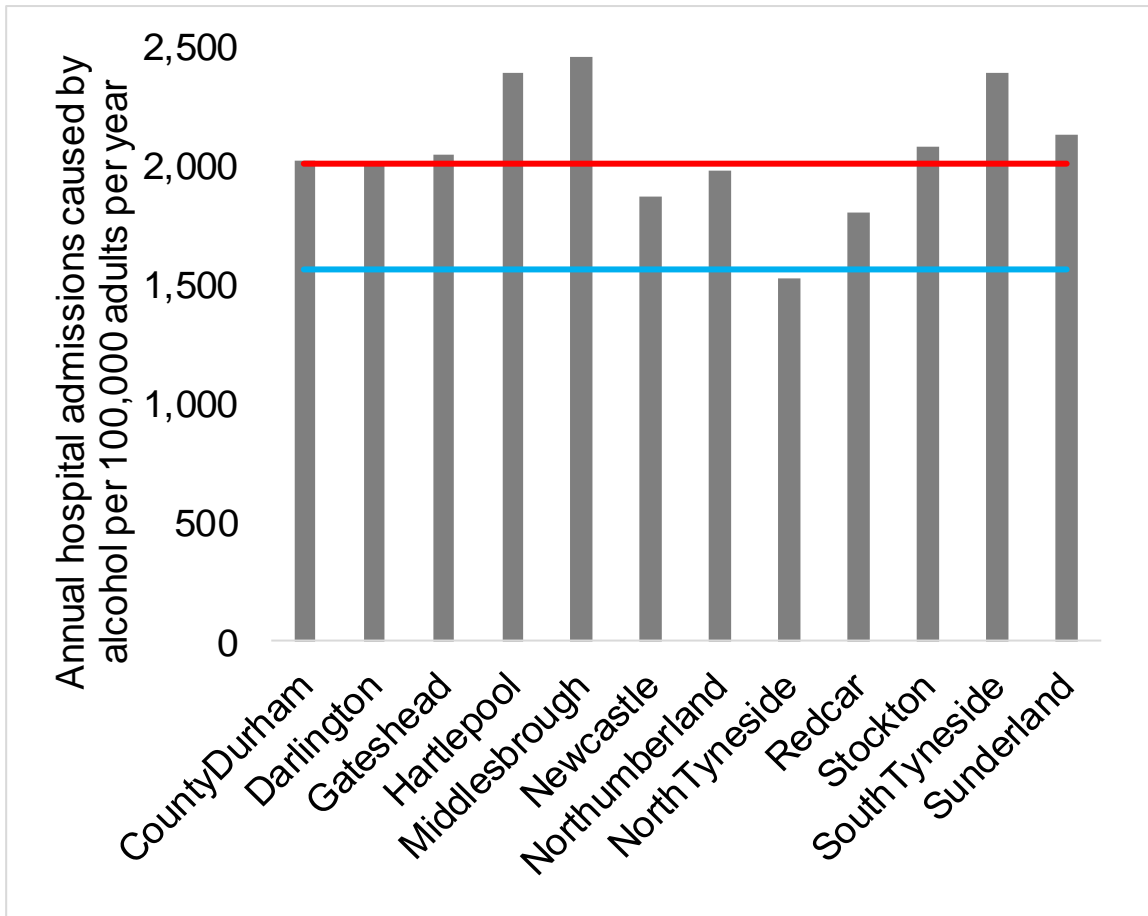

% of all alcohol sold under 50p per unit consumed by drinker group

England

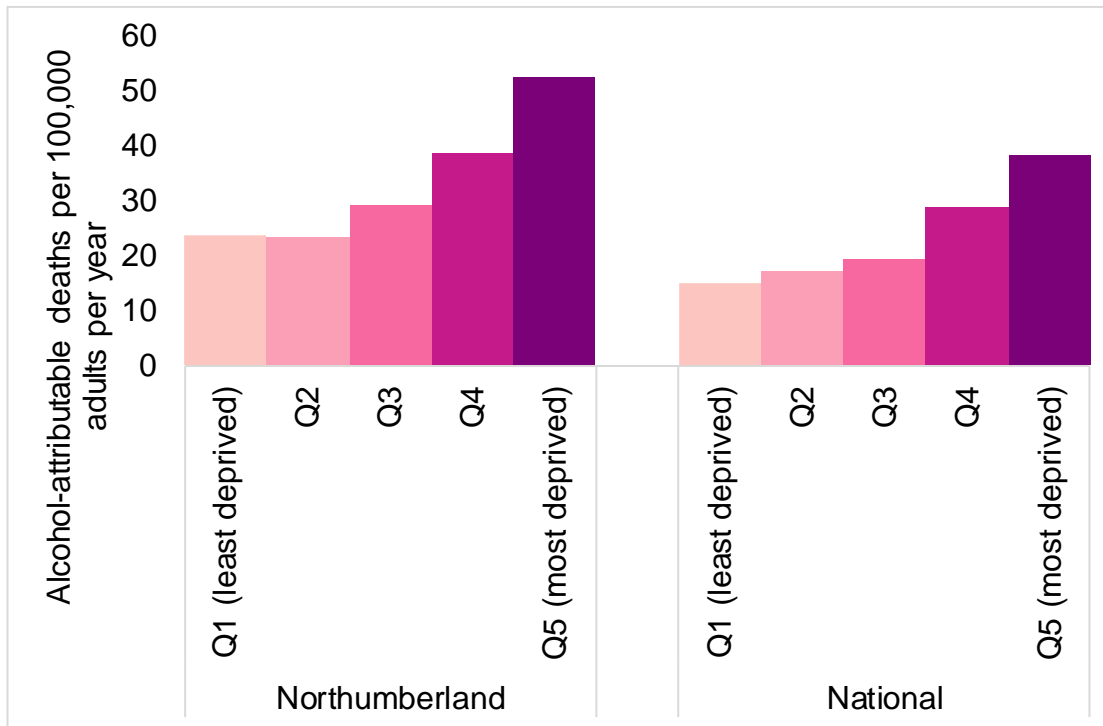

Alcohol attributable hospital admissions per 100,000 adult per year

The **North East** experiences more alcohol related hospitalisations per population than **nationally**

Alcohol-attributable Deaths per 100,000 Adult Population by Index of Multiple Deprivation Quintile

More deprived areas experience higher rates of alcohol attributable deaths – and the gap between rich and poor can be bigger in many LAs than it is nationally

Impact of MUP

Impact of a 50p MUP locally?

Northumberland

Impact of 50p MUP on Average Weekly Alcohol Consumption

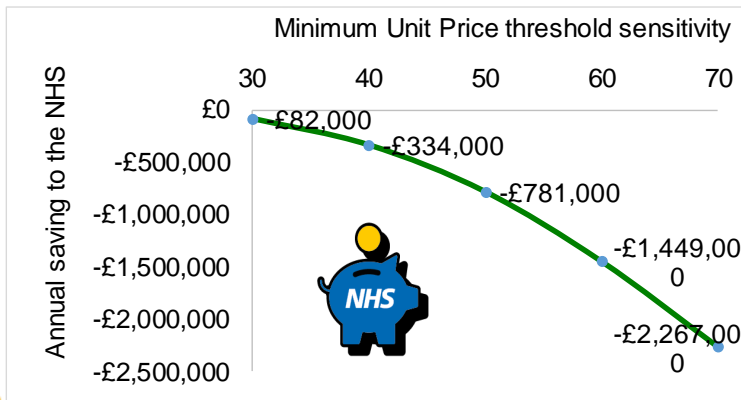

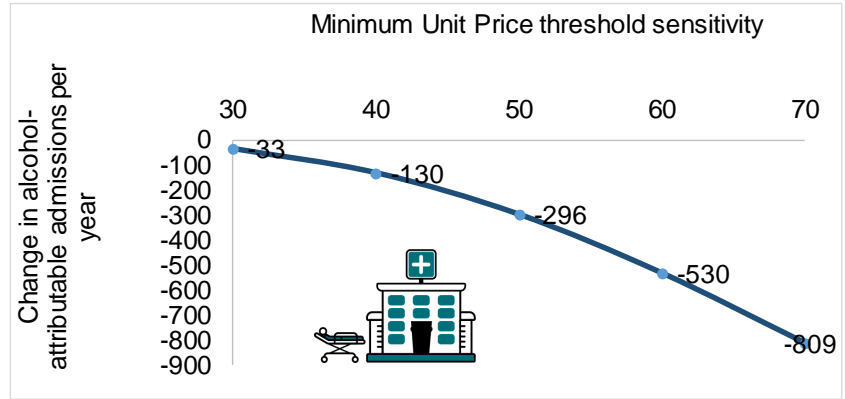

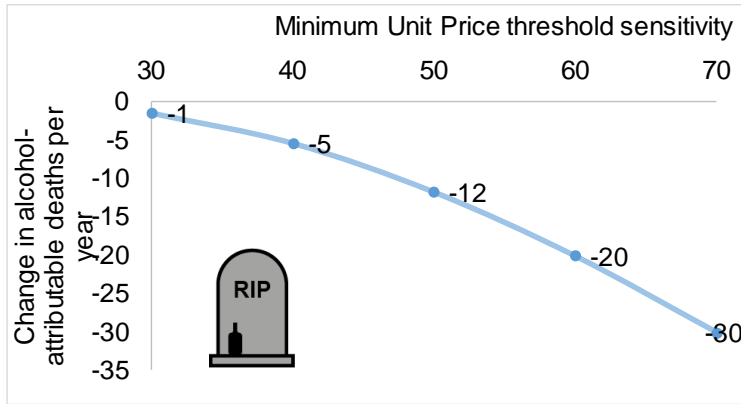

Impact of 50p MUP on alcohol related deaths is bigger in **North East** than **Nationally**

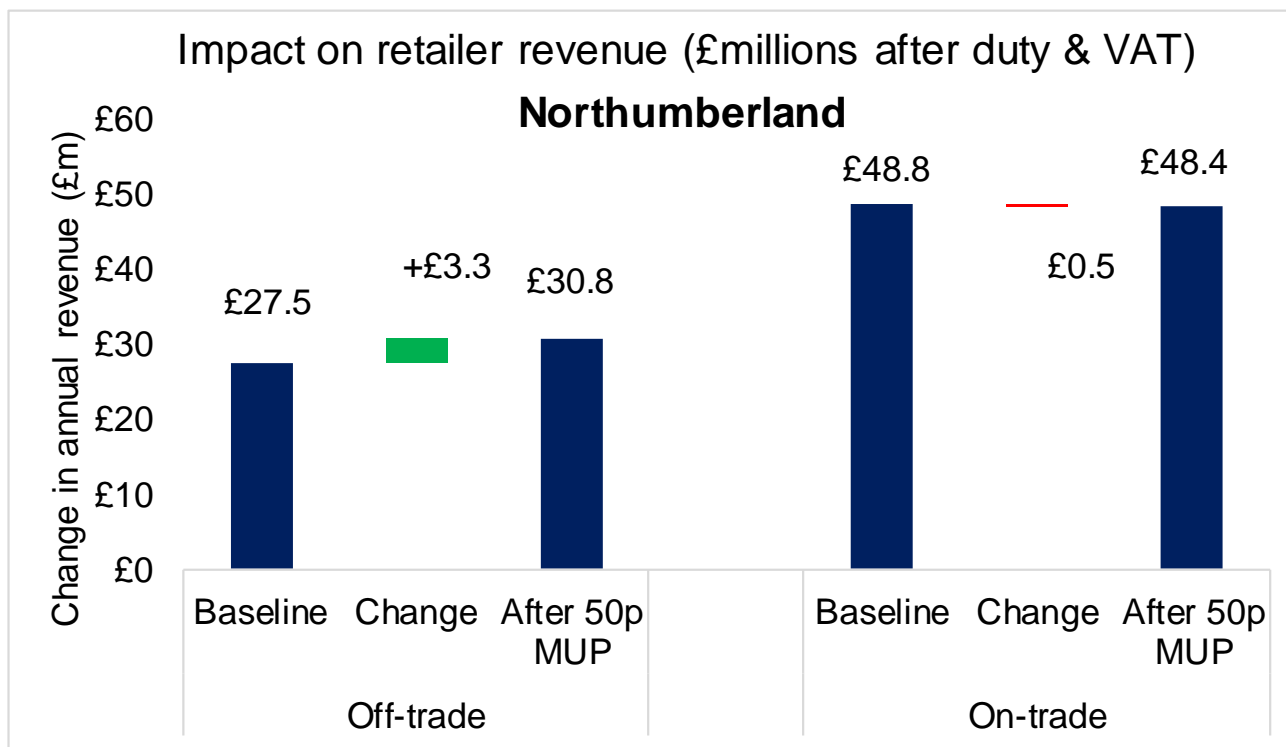

Impact on alcohol related deaths is bigger in higher risk drinkers and in deprived areas

A 50p MUP is around 10 times more effective than a 30p threshold & 2 times more effective than a 40p threshold

Impact on Alcohol Sales for Business

Off trade retailers
would see substantial
increased revenue

On trade retailers
would see very little
change in revenue
