Glacial Geomorphology of the British-Irish Ice Sheet

This map utilises digital data from a number of sources:
- Coastline from thematicmapping.org

This map is © Department of Geography, The University of Sheffield, 2017

Explanatory Note

We acknowledge the British Geological Survey for part funding the first BRITICE project. Support for this work came from the NERC consortium project BRITICE-CHRONO. We are also deeply grateful to the Irish Geology Survey and British Geology Survey for their cooperation in providing thematic data. All relevant copyright holders are thanked for their coastline data.

This map was compiled from a review of the published academic literature, Irish Geology Survey mapping, and British Geology Survey mapping. Field checking has not been performed, and we merely report what has been published. Data were digitised and entered into a geographic information system (GIS). A generalised version of the map can be found at https://www.sheffield.ac.uk/geography/staff/clark_chris/britice. This map depicts a filtered database of the published literature, removing repetition of mapped features. The map is designed to be viewed digitally, at a scale of 1:200,000.
