

The  
University  
Of  
Sheffield.

**The IMPACT programme aims to support both children and parents in developing their knowledge of University.**

The programme works with Year 7 and Year 8 students from selected schools, bringing them together with their parents' to share information about Higher Education, graduate employment options, and introduce them to the University of Sheffield.

Our workshops and activities are designed with both pupils and parents in mind, giving you and your child the confidence, tools and skills to make an informed, joint decision about your child's future.

### Year 7

Typically, in Year 7, the University will visit pupils and parents in school and bring the highlights of the University to you!

Pupils and parents will also get the chance to visit the University, take a tour of our campus and speak to student ambassadors.

## Year 8

Ever wondered what it's like to move away from home?

In Year 8, parents and pupils will visit the University of Sheffield Student Village and gain an insight into student life, student finance, budgeting and university accommodation.

Finally, we will celebrate your completion of the programme with a certificate presentation!

## Who can apply to IMPACT?

IMPACT is for young people who have the academic potential to succeed at the University of Sheffield but may feel uncertain about whether it is the right option for them. Students are selected by their school to become part of IMPACT if they meet the following criteria:

- Be the first generation in their immediate family to enter Higher Education
- Be from an area of low progression to university (your school can help you with this information)
