

Placement year.

If you do a placement year course, you spend a year working within the field of psychology or applying your transferable skills in industry. Students do their placement year between level two and level three.

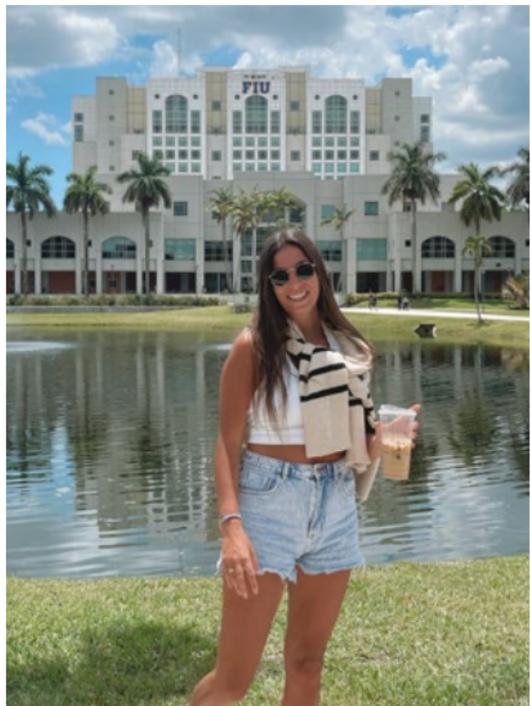

You'll pay reduced fees for the year you're on placement and also have the support you need from your tutor and the University.

Organisations where our students have done their placements include:

- IBM (project management)
- NHS Foundation Trusts (Assistant Psychologist)
- Hays Recruitment (Recruitment Consultant)

Study abroad.

If you want to study abroad for a year, you can apply to spend time in a destination including Australia, Canada, Europe, India, New Zealand, Singapore and the USA after you've joined the University. This experience usually takes place between level two and level three.

Be Sheffield

Made.

The information given here is based on the current academic year. There may be some changes before you start your course. For the latest information, visit our website.

Your
Psychology
course.

UCAS code:
C800 / C803

In the first two years of your degree you'll study fundamental psychology topics like how memory works, how children learn, and the biology behind human behaviour.

You'll also learn about psychological research methods, how to design and conduct your own experiments, and how to analyse data and present your findings. You'll put these skills into practice during your level three research project.
