Investing in learning & teaching

The Diamond

The number of hours worked on site so far is 400,000

In December 2014 more than 55% of the workforce came from a Sheffield postcode or from within 30 miles of the site

11,000 cubic metres of concrete have gone into the frame provided by a company that’s based only 2.5 miles from the site

Over 600 of our students have visited the site

The external lattice of the building has over 10,000 individual elements to fit

There’ll be 300 tonnes of steel on the façade, the roof and the pods

And about 270 km of cable, wiring for lighting & other similar material
