**Efficacy and Mechanism Evaluation Programme**

Although there is no limit to the amount of money you can ask for on one proposal, applicants should be aware that they will be competing for limited funds. There are no fixed limits on the duration of projects or funding, and proposals should be tailored to fully address the problem. However, applicants should balance the pressing need for the information with the need to follow participants up for long enough to measure important outcomes.

## **Public Health Research programme**

The PHR programme evaluates public health interventions, providing new knowledge on the benefits, costs, acceptability and wider impacts of non-NHS interventions intended to improve the health of the public and reduce inequalities in health. The scope of the programme is multi-disciplinary and broad, covering a range of interventions that improve public health. Applicants are asked to submit an outline application for the above funding opportunity by **1pm on Monday 15 August 2011**.

## **NIHR Public Health Research programme - Road Safety: The Public Health Impact of decreasing the amount of Street Lighting**

The Public Health Research (PHR) Programme invites proposals to evaluate the public health impact of decreasing the amount of street lighting. The UK has about 7.5 million streetlights, which cost up to £500 million per year. The cost of running and maintenance has risen significantly over the last five years. A number of local authorities are changing the provision of street lighting for financial reasons, often between midnight and 5am. In this call, the programme is interested in comparatively short studies. Applicants are invited to submit proposals for comparative short studies by 22 August 2011. ## **NIHR Clinical Lectureship - 2011**

The NIHR Clinical Lectureships are specialty training posts that incorporate academic training. Clinical Lecturers (CLs) spend 50% of their time undertaking specialist clinical training and 50% undertaking research or educationalist training. CLs are aimed at those who are advanced in their specialty training, have completed a research doctorate or equivalent and show outstanding potential for continuing a career in academic medicine. The duration of a CL is for a maximum of 4 years or until CCT is reached, whichever is sooner. Alongside clinical training, CLs will be able to develop their academic skills and will be encouraged to apply for funding to support further postdoctoral or educationalist training. The 2011 NIHR Clinical Lectureship recruitment round is now open and will end on 31 March 2012.

Prospective applicants must contact the relevant Deanery in the first instance for further information on post availability and the recruitment process.
