Scope: A collection of documents and glass slides relating to the career of Sir Arthur John Hall, Professor of Medicine in the Sheffield Medical School from 1915 until 1931

Dates: 1883-1931
Level: Fonds
Extent: 15 boxes
Name of creator: Sir Arthur John Hall

Administrative/biographical history:
The collection consists of lecture notes, case notes, correspondence, medical papers, offprints and glass slides relating to the career of Sir Arthur John Hall; in particular to his work on epidemic encephalitis and also to the development of the School of Medicine at Sheffield.

Sir Arthur John Hall (1866-1951) enrolled in the Sheffield Medical School in 1883, but left shortly afterwards to study first in Cambridge and then at St. Bartholomew’s. He returned to Sheffield in 1889 as a member of staff of the Medical School. He rose to be Professor of Medicine in 1915, a post he held until 1931. Hall's efforts on behalf of the study and teaching of medicine in Sheffield, his work for the benefit of the College and the University, and his research, made him highly respected not only in the City but in the academic community in general.

Source: Transferred from the University of Sheffield’s Medical & Dental Library
System of arrangement: By category
Subjects: Medicine – Study and teaching; Epidemic encephalitis
Names: Hall, Sir Arthur John (1866-1951); University of Sheffield – School of Medicine
Conditions of access: Available to all researchers, by appointment
Restrictions: None
Copyright: According to document
Finding aids: Outline listing
MS 82
Hall Manuscripts

Outline listing:
