Your professional life starts here.
Sheffield University Management School Undergraduate Prospectus.
We work with businesses to solve problems. We also train the business leaders of the future – that’s you. What makes us unique is the way we mix the two, bringing students and businesses together so they can learn from each other.
We’d love you to join us
Choosing a university is the first big decision of your professional life. We understand you want to make that decision count. Choose Sheffield and we’ll dedicate ourselves to helping you make the most out of every opportunity.

Your development is our highest priority. Right from the start, we’ll encourage you to think about your career. We’ll listen to you and provide you with all the support you need to achieve your goals. But before we get into the details, here’s a quick reminder of three compelling reasons to choose Sheffield.

Excellent prospects
Our Triple Crown accreditation puts us among the top one per cent of business schools in the world. Ninety-seven per cent of our Business Management students started work or further study within six months of graduating. Eighty-five per cent of those working were in professional or managerial jobs (Higher Education Statistics Agency).

First-rate teaching
Our teaching staff are leading researchers whose work influences the way the world does business. More on this later. Entrepreneurs and other professionals teach on modules and give lectures. Businesses host student projects.

Real-world experience
We know as well as anyone that theory is no use without practical experience. That’s why we’ve invested in our own Employability Hub, where staff will help you find internships and work placements that fit with your career plans.

Your professional life starts here.
Plan your career.

Being employable isn’t just about qualifications and experience – though they’re both important. Business is about people. To make it on to anyone’s shortlist you need certain personal qualities. You need certain practical skills. Above all, you need to show the potential to develop.

You tell us where you want to be and we’ll help you plan so that everything you do at university keeps you moving in the right direction.

Double the support

All Sheffield students benefit from an outstanding Careers Service. As one of our students, you also get a full package of support from the school’s dedicated Employability Hub. This includes one-to-one advice, skills training and special events connecting you to businesses. You’re supported throughout your course and for up to three years after you graduate.

Experience that counts

We’ll help you to find part-time jobs, internships and year-long placements (more on these on page 34). We’ll do everything we can to help you find opportunities that fit with your career plans and meet your development needs.

Networking opportunities

Our External Relations team builds relationships with alumni and businesses so you get lots of opportunities to meet professionals and learn from them. We can also teach you how to develop networks of your own, how to make face-to-face meetings count and how to use social media effectively.

“I did a two-month internship in BNY Mellon, one of the biggest investment banks. My internship helped me gain some practical experience and I can now understand my course in greater depth having seen some real-life scenarios.”

Anamil Kochar, BA (Honours) Accounting and Financial Management

Skills sessions

Including CV writing, marketing yourself, interview techniques and assessment centre preparation.

The Careers Discovery Series

Every year, we invite a series of guests to come and talk to students about career options in different areas of business, from marketing and human resources, to logistics, banking and innovation. The guests come from SMEs and multinationals. They include well-known entrepreneurs and successful alumni.
"I had always wanted to set up my own business and was interested in what makes businesses succeed or fail. I applied for the USE Business Planning Competition with my idea for the Bear Socks Company and won! USE were enthusiastic about my idea, giving constructive feedback, being patient with all my questions and pointing me in the right direction when I needed advice, as well as giving me the confidence to keep going and make it happen."

Ollie Chapple, BA (Hons) Business Management and founder of the Bear Socks Company

Make your CV a real page-turner.

What will your CV look like in four years’ time? A First or 2:1 from a Russell Group institution is a great opener, but if you’re serious about your career you need to say more. Choose Sheffield and we’ll give you plenty to talk about.

As well as degrees with work experience, international summer schools and the chance to learn a second language, we offer an extraordinary range of extra-curricular activities. Get involved in what Sheffield has to offer and you won’t just have a strong CV – you’ll have an adventure story.

Our volunteering programme is one of the biggest in the UK. It even enables enterprising students to develop their own projects. The University’s dedicated enterprise hub (USE) helped 200 students set up businesses and run events last year. There’s also Enactus, a student-led company, which runs community empowerment projects in the local area and overseas.

The award-winning Students’ Union has over 300 different student societies to choose from. The Management Society (ManSoc) organises social events and careers-related activities, and the Investment Society manages a fund of £102,000 across a diverse portfolio.

- Start your own business
- Manage and promote events
- Work with community groups and other organisations
- Get involved in running projects and chairing society committees

You write the story. We’ll make sure it’s heard. The University is part of the national Higher Education Achievement Record (HEAR) scheme that provides you with an official record of all your grades and extra-curricular achievements, highlighting the specific and transferable skills you’ve learned.
A global outlook.

The jobs market is a global one. Workplaces are often multilingual. Even if you never travel (which is unlikely), you’re still going to be working and doing business with people from all over the planet. A degree from Sheffield University Management School prepares you for that.

Sheffield is an international university. We have over 7,000 international students from 121 different countries. The Management School is one of the most diverse schools in the University with 45 different nationalities represented on our undergraduate courses alone.

We want you to be a citizen of the world. Embrace the opportunities we offer and you’ll develop attributes that make you a frontrunner for any job: confidence, independence, heightened cultural awareness, advanced social skills and the ability to work in multicultural teams.

Spend a year overseas
International Business Management students spend their second year at another leading business school in Europe, Australia, Canada, Hong Kong or the USA. All the work you do counts towards your degree.

A semester
Our Business Management students have the option to spend a semester at a European university (in France, Germany or Spain for example) through the Erasmus programme.

Or just the summer
If you don’t want to be away for that long but you still want to travel and experience new cultures, you might be interested in one of our international summer schools. Previous destinations include Paris, Maastricht, Mannheim and Moscow. They’re heavily subsidised so you only pay a small fee.

Learn a language
Another of Sheffield’s great assets is that we teach a lot of different languages. As well as the usual modern European languages, we offer Russian, Dutch, Polish, Japanese, Chinese and Korean amongst others. You can study a language as part of your degree, at no extra cost.

“In my second year of study at the University I had the chance to spend a semester overseas at Copenhagen Business School. It was an unforgettable experience and the lessons I learnt both in and out of the classroom will stay with me through life.”
Francesca Hall, BA (Hons) Business Management
As a major research university, well known for academic excellence and an award-winning student experience, we’re constantly investing in new buildings, new resources and new ways of supporting our students.

The Management School itself is something special. In addition to state-of-the-art lecture theatres and seminar rooms, there’s our Employability Hub, IT suites and café, plus social and study spaces. Our new Trading Room, developed with Lloyds, is equipped with financial market industry software.

Study when it suits you
The brand new £81m Diamond building has 1,000 study spaces and an on-demand print collection. The Information Commons, known as the IC, has 1,300 study spaces, 100,000 books and on-site tech support. They’re both open 24/7, so you can study whenever you like.

Make the most of your leisure time
The UK’s best Students’ Union has its own cinema and year-round programme of entertainment that includes some of the country’s best-loved club nights. Two minutes down the road from the Management School, the University’s sports centre has a pool, gym, indoor courts and floodlit pitches.

And relax in a real home from home
The majority of our award-winning accommodation is in one of the UK’s most sought after residential areas, a short walk from the Management School.
Not all leading universities are the same. One of the many things that makes Sheffield unique is the city itself: a major cultural centre, creative, industrious and enterprising, on the edge of the Peak District National Park, one of the UK’s most famous areas of outstanding natural beauty.

If you’re the kind of person who takes their work and their leisure seriously, the Sheffield package is hard to beat. When you consider we also have the UK’s best Students’ Union and superb accommodation, you start to see why so many students choose Sheffield.

An extraordinary place.
First-rate teaching.

How we teach
Our style is practical and interactive. We don’t expect you to just sit in lecture theatres and absorb information. We take steps to make sure you engage with businesses through project work, guest speakers, case studies and work experience, so you can apply what you learn to the real world.

Professional insight and advice
Our academics work closely with businesses. Many of them are former professionals – accountants, consultants, entrepreneurs and managers. They teach because they love it. They want to share their knowledge and experience with future generations.

Partners from businesses of all sizes teach on modules, give guest lectures and host student projects. Our close links with organisations keep us in tune with the changing demands of the workplace. We know what employers are looking for.

Applying what you learn
Showing you how to apply what you learn is a top priority for us. It’s part of the curriculum. We use case studies and business scenarios so our teaching is always rooted in real-world situations. On the Business Challenges module, for example, you’ll take part in a simulated business situation where you have to make operational and financial decisions.

Group work and presentations help you develop vital transferable skills. We teach the latest theory and we expect you to challenge it as you learn to think independently.

Assessing your skills
We focus on the practical. You’re assessed on project work, presentations and your ability to work within teams, as well as the traditional essays and exams. Your second year counts for about a third of your degree classification, with the final year counting for the other two-thirds.

"Before moving into academia, I worked at managerial and operational level for international engineering companies. This 15-year career in industry means that I can offer real-world insight into the problems my students will encounter in the workplace.”
Dr Dermot Breslin, Lecturer in Organisational Behaviour

of students achieve a First or 2:1 degree

Our research: how you benefit.

We work with businesses to solve problems. That work forms the basis of what we teach. This means you have access to new ideas and methods long before they become standard practice.

You’ll be taught by academics who are helping to influence businesses, organisations and policy makers, not just in the UK but internationally. They’ll show you the value of a focused, methodical approach to problem solving. And you’ll graduate with a level of insight that sets you apart from your peers.

Green is good

We’re showing businesses worldwide how cutting carbon emissions can increase profits, improve performance and promote growth. Our Supply Chain Environmental Analysis Tool (SCEnAT), developed by Professor Lenny Koh, has generated savings of up to £250,000 per company. In one case, our recommendations led to new contracts worth £1.75m.

Positive change

Through our Institute of Work Psychology we use research to help companies reduce staff absence, improve morale and boost productivity. The Scenarios Tool shows businesses how to anticipate change and how to plan for it, making the transition much smoother for staff. Partners include BUPA, Rolls-Royce and Royal Mail.

This is just a taster

There’s much more going on. We’re also working on an accountancy model for sustainable economic growth in China and Europe, logistics innovations for retailers such as Avon, Christian Salvesen, O2 and PC World, and ways for large and small companies to improve their market position through philanthropic activities.

“Staff at Sheffield are enthusiastic and proactive, and our student feedback reflects this. We constantly refine and improve students’ learning experiences – ensuring a rigorously academic yet practical education.”

Dr Nicki Newman, University Teacher in Marketing and Undergraduate Director for Teaching Quality and Enhancement

“The content that I teach is directly influenced by my research and extensive experience working with organisations. The ever increasing pace of change means that the ability to be creative and innovative in the workplace is becoming a necessary skill for graduates. My teaching aims to develop both a theoretical, critical understanding of creativity and innovation in organisations, as well as the practical skills with which to implement the thinking.”

Dr Kamal Birdi, Senior Lecturer in Occupational Psychology
Skills training

The University’s 301 Student Skills and Development Centre offers extra training in everything from advanced maths and essay writing, to exam revision and presentation skills. International students can get English language support from the English Language Teaching Centre. There’s specialist one-to-one support for students with dyslexia and other conditions which affect your learning ability.

One-to-one support

At the start of the first year, you’ll be assigned a personal tutor – a Management School academic – who will be your main point of contact throughout your course. If you have a question about academic work or you’re concerned about a personal matter, your personal tutor is there to help. Teaching staff are also available within set hours each week for you to drop in and ask questions about the course or assessments.

Supporting you every day

The helpful people in the Management School’s Student Experience Office are there to make sure everything’s running smoothly. They offer practical advice on day to day things related to you course, such as your timetable and deadlines for assignments, as well as referring you to other support services within the University.
Forget what you think you know
This course will challenge all your assumptions. We’ll show you how things are changing in the profession and you’ll get more than a glimpse of what the future looks like. Using case studies and realistic simulations, we’ll train you to analyse business situations, think on your feet and deliver solutions.

You will learn all the theories and techniques, progressing from intermediate to advanced accounting and financial management over the three years. We’ll show you how these disciplines fit within organisations and how they relate to strategy, corporate governance and public policy.

Learning about the real world of work is a big part of the course. You will study workplace culture and behaviour in detail. Group work will help you develop useful transferable skills such as effective communication, teamwork and leadership. You’ll learn how to build strong professional relationships and how to make the most of opportunities.

Doing well is fine. But we want you to excel. As your confidence grows, you’ll start to realise that this is achievable.

Making you ready for work
Eighty-nine per cent of our graduates went on to work or further study within six months. The average starting salary was £20,000 (Higher Education Statistics Agency).

What you learn on this course is going to help you throughout your career. Our teaching methods give you the practical skills you need to land that first job and a level of insight that marks you out as leadership material.

Extra maths support
You can get back-up maths sessions from the University’s 301 Student Skills and Development Centre (see page 18).

UCAS CODE: N420

BA (Hons) Accounting and Financial Management.

“My favourite thing about my course has been the diversity of the modules. I love the fact that you can tailor the course to your own interests. For example, if you want to study theoretical finance you can, or if you prefer investment banking there are modules specialising in that. Equally if you are aiming to take your accounting qualifications after graduation you can choose modules to exempt you from certain exams within these qualifications.”

Hannah Regan, BA (Hons) Accounting and Financial Management

“The financial accounting modules I studied have been extremely beneficial for me when analysing prospective customers’ accounts. Studying financial derivatives helped me quickly understand the complex foreign exchange products that Santander offers. The course also helped me develop my transferable skills – working on group projects helped me learn the importance of teamwork, communication and delegation which I have been able to apply when tasked with managing projects in my role.”

Michael Ginn, graduated 2013
Corporate Banking Graduate at Santander

“My course has significantly assisted me during my career thus far – it has been very beneficial to have a solid understanding and knowledge base of accounting principles and techniques. It has also helped in other ways – during the course I completed several pieces of coursework as part of a group which, in the real working world, is how all work is carried out.”

Edward Stevenson, graduated 2014
Analyst at Ernst & Young

sheffield.ac.uk/management | 20 - 21
YEAR ONE

You will study:

Analysis for Decision Making (20)
Business Economics (10)
Introduction to Behaviour at Work (10)
Introduction to Financial Accounting (20)
Introduction to Financial Management (20)
Introduction to Management Accounting (20)
Professional Self Management (10)

Plus optional modules to the value of 10 credits from:

Business Challenges (10)
Unrestricted module to the value of 10 credits

YEAR TWO

You will study:

Financial Management (20)
Intermediate Financial Accounting (20)
Intermediate Management Accounting (20)
Introduction to Corporate Finance and Asset Pricing (20)

Plus optional modules to the value of 40 credits from:

Budgeting and Control (20)
Business Intelligence (20)
Business Strategy (20)
Career Management Theory and Practice (20)
Equity Analysis and Investments (20)
Issues in Corporate Governance (20)
Law for Management (20)
Quantitative Methods for Accounting and Finance (20)

Unrestricted modules to the value of 20 credits

YEAR THREE

You will study:

Advances in Financial Accounting (20)
Advances in Management Accounting (20)

Plus optional modules to the value of 80 credits from:

Accounting and Accountability: Theory and Practice (20)
Auditing (20)
Case Studies in Accounting and Financial Management (20)
Corporate Finance (20)
Corporate Social Responsibility (20)
Emerging Markets Finance (20)
Financial Derivatives (20)
Taxation in Theory and Practice (20)

Unrestricted modules to the value of 20 credits

Each year you study 120 credits. These are split into modules, worth either 10 or 20 credits. Each year you can study up to 20 unrestricted credits – these can be modules from within the Management School or from another department, subject to availability. In your first year you will also take part in Achieve More, an interdisciplinary project which brings you together with students from other departments to develop solutions for real-life issues.

Accreditations and exemptions

Modules are accredited by various professional bodies, including the Association of Chartered Certified Accountants (ACCA), the Institute of Chartered Accountants in England and Wales (ICAEW) and the Chartered Institute of Management Accountants (CIMA). Complete the degree and you’ll be exempt from many professional exams, giving you a head start in your career development.

For a full list of accreditations and exemptions, see our website.

Add a placement year. See page 34 to find out more.
Picture yourself ten years from now
Career firmly established. A certificate (or two) from Sheffield on the wall in your office. You’re a manager. Maybe you’re the manager. Maybe you’re the director of your own company. You know about every area of the organisation and how it works. You lead a multidisciplinary team. They follow you because they trust you.

Here’s how we get you there
Our BA (Hons) Business Management is multifaceted. We cover a diverse range of subjects because that’s the kind of foundation you need to be a business leader. You’ll study all the core business functions, including finance, HR, operations and marketing. We also teach important skills such as accounting and quantitative analysis.

As you progress, the course becomes more and more flexible, so you can choose to specialise in one area – marketing, for example – or keep your options open. Our job is to produce graduates with the potential to inspire others. People who can handle change, solve problems and make sound judgements under pressure. That’s why we focus on the practical. Through case studies and project work, we’ll get you to apply what you learn, work with others and develop vital transferable skills.

You’ll be taught by leading researchers, specialists in areas such as sustainable business, HR management, international business strategy and the public sector. Professionals contribute to some of the modules. We expect you to take a critical, analytical view of current theory. Challenge accepted wisdom. Push things forward. Because one day you’ll be someone people look to and ask: What’s next?

Give yourself the best possible start
Ninety-seven per cent of graduates were in work or further study within six months. Eighty-five per cent of those jobs were professional or managerial. The average starting salary was £18,000 (Higher Education Statistics Agency). What you learn on this course will help you throughout your career, from that first job right to the top of your profession.

Extra support
Don’t forget the University’s learning support package includes revision workshops, help with essay writing, presentations and advanced maths, plus English language classes for international students.

UCAS CODE: N200

Dräger has recently opened a new manufacturing facility in the Czech Republic and my role is to manage the production move from some of our different manufacturing sites across Europe. The process of researching all of the necessary topics, and then choosing the framework that best suits the needs of the project in question is something I learnt during my course and it has certainly helped me in my work.

Grant Hann, graduated 2012
Global Project Manager at Dräger

“The course allowed me to develop a range of skills and knowledge, whilst also offering focus on areas best suited to my future ambitions in marketing. Understanding how the different parts of the business operate, are managed and fit together has been helpful in such a large organisation. I currently work in the Christmas Campaign Team within the Brand stream and am developing a proposition for Christmas merchandise.”

Sophie Jacobs, graduated 2013
Marketing Graduate at Tesco

“I enjoy the variety of topics covered on my degree, as well as the choice of modules in the second and third years. The lectures and tutorials are interesting and academically stimulating, and applied to real-world case studies which is extremely useful.”

Jack Smith, BA (Hons) Business Management
YEAR ONE

You will study: Plus optional modules to the value of 10 credits from:

- Accounting and Finance for Managers (20)
- Analysis for Decision Making (20)
- Business Economics (10)
- Business Management in Context (20)
- Business Challenges (10)
- Introduction to Behaviour at Work (10)
- Management Themes and Perspectives (20)
- Professional Self Management (10)
- Unrestricted module to the value of 10 credits

YEAR TWO

You will study: Plus optional modules to the value of 40 credits from:

- Business Strategy (20)
- Essentials of Marketing (20)
- Organisational Behaviour (20)
- Principles of Operations Management (20)
- Business Intelligence (20)
- Business Statistics (20)
- Career Management Theory and Practice (20)
- Enterprise and Entrepreneurship (20)
- Human Resource Management (20)
- Issues in Corporate Governance (20)
- Law for Management (20)
- Managing Organisational Change and Learning (20)
- Research Methods (20)
- Unrestricted modules to the value of 20 credits

YEAR THREE

You will study: Plus optional modules to the value of 100 credits from:

- Corporate Social Responsibility (20)
- Consumer Psychology (20)
- Creativity and Innovation (20)
- Critical Perspectives in Work and Organisational Psychology (20)
- Digital Marketing (20)
- Entrepreneurship and Human Resource Management (20)
- Industrial Relations (20)
- Integrated Marketing Communications (20)
- International Business (20)
- International Marketing (20)
- Language and Organisation (20)
- Management Project (20)
- Strategy Practice (20)
- The Leisure Industry (20)
- Work and Employment in the Twenty-First Century (20)
- Work-Related Health and Well-Being (20)
- Unrestricted modules to the value of 20 credits

Each year you study 120 credits. These are split into modules, worth either 10 or 20 credits. Each year you can study up to 20 unrestricted credits – these can be modules from within the Management School or from another department, subject to availability. In your first year you will also take part in Achieve More, an interdisciplinary project which brings you together with students from other departments to develop solutions for real-life issues.

Add a placement year. See page 34 to find out more.
BA (Hons) International Business Management.

Fast-track to success
Most business degrees with a year abroad take four years to complete. We do it in three. And the quality of education you’ll receive is world-class.

We’re all international now. Every organisation, large or small, needs people who understand global business practice. People who can spot opportunities and put global plans into action. People who can bring together international teams. That’s what this course is all about. We nurture independent spirit. We expect you to learn the theory and we want you to challenge it as you grow and develop. Through case studies, project work and problem solving exercises we’ll show you how to apply what you learn. Working closely with others, you’ll develop vital transferable skills.

The second year expands your horizons. Studying at a partner university overseas, you’ll learn how businesses operate in different cultures. More importantly, you’ll learn how people think and feel in other cultures. This kind of insight gives you a serious edge in the jobs market.

The year abroad is a massive boost to your personal development. As you live, study and socialise alongside people from other cultures, you’ll build confidence, self-reliance and cultural awareness. Not to mention some very special memories and an international address book of friends and contacts.

The best start for your international career
Ninety-six per cent of graduates were in work or further study within six months. Many of those jobs were with big multinationals. The average starting salary was £18,000 (Higher Education Statistics Agency). From first job to top job, the things you learn on this course will help you throughout your career.

About your year abroad
No matter where you go, the second year is taught in English and all the modules are approved by Sheffield University Management School. You pay a reduced fee to Sheffield for the year abroad but you don’t pay fees to the partner university.

To qualify for the year abroad, you have to pass your first year with an average grade of at least 60 per cent at first attempt with no failed modules. If you don’t achieve those marks, you’ll switch to the BA (Hons) Business Management and spend your second year in Sheffield.

"The study abroad component has been extremely insightful as it gave me the opportunity to explore the business operations of another culture. I undertook my study abroad year at Griffith University, Queensland, Australia. It was interesting to compare the operations practiced there to those in England and to apply the theoretical models and perspectives explored at the University of Sheffield to the case studies discussed within modules in Australia. This experience has greatly contributed to my understanding of the operational processes of international businesses.”

Udara Cumaratunga, BA (Hons) International Business Management

"My course developed my critical thinking skills and an entrepreneurial mindset. It helped me to get out of my comfort zone and stretch my abilities. My current role involves researching disruptive financial technology trends and scouting for innovative companies in Israel, the UK and Silicon Valley. I also meet with our partner network companies to look at opportunities for creating innovative solutions together.”

Mingaile Vaisnoraitė, graduated 2014, year abroad at Copenhagen Business School (Denmark) Innovation Consultant in the Research and Scouting Team at RBS

Where can I go?
Austria, Australia, Canada, Denmark, Finland, France, Germany, Hong Kong, Italy, The Netherlands, Sweden or the USA.

You may have to be flexible and go with your second or third choice of partner university if your first choice is oversubscribed.

UCAS CODE: N120
Each year you study 120 credits. These are split into modules, worth either 10 or 20 credits. In your first and third year you can study up to 20 unrestricted credits – these can be modules from within the Management School or from another department, subject to availability. In your first year you will also take part in Achieve More, an interdisciplinary project which brings you together with students from other departments to develop solutions for real-life issues.

**YEAR ONE**

You will study:
- Accounting and Finance for Managers (20)
- Analysis for Decision Making (20)
- Business Management in Context (20)
- Business Economics (10)
- Introduction to Behaviour at Work (10)
- Management Themes and Perspectives (20)
- Professional Self Management (10)

**Plus optional modules to the value of 10 credits from:**
- Business Challenges (10)
- Unrestricted module to the value of 10 credits

**YEAR TWO**

You will study a programme of business related modules agreed between your partner university and Sheffield University Management School. All teaching is in English.

**YEAR THREE**

You will study a minimum of two from the below:
- Extended Essay in International Business (20)
- International Business (20)
- International Marketing (20)

**Plus optional modules to make a total of 120 credits (60 – 80 credits from the below):**
- Business and Management in Contemporary Korea (20)
- Consumer Psychology (20)
- Corporate Social Responsibility (20)
- Creativity and Innovation (20)
- Critical Perspectives in Work and Organisational Psychology (20)
- Digital Marketing (20)
- Entrepreneurship and Human Resource Management (20)
- Industrial Relations (20)
- Integrated Marketing Communications (20)
- Law and Business in China (20)
- Strategy Practice (20)
- Work and Society in Japan (20)

**Unrestricted modules to the value of 20 credits**

“I often look back at the skills I learnt during my time at Sheffield. These include my study abroad experience where you build lasting relationships and an instant global network, as well as the thorough grounding in the fundamentals of business I gained from the course content, which is invaluable as a consultant.”

Jake Campbell, graduated 2013, year abroad at Virginia Technical University (USA) Consultant in the Risk Analytics Team at Deloitte
"Studying a dual honours course gave me the perfect opportunity to study a subject that I have always enjoyed, Mathematics, combined with a new subject – in my case – Business Management. Studying modules in pure maths, statistics, management and economics has given me a well-rounded outlook and an array of skills to apply to real-life situations."

Chris Morgan, BA (Hons) Business Management and Mathematics

If you can’t decide between two subjects, a dual honours course might just be perfect for you. Dual honours courses allow you to specialise in two, complementary subject areas. International Business Management isn’t available as a dual honours course, but you can study Accounting and Financial Management or Business Management with a subject from another department.

<table>
<thead>
<tr>
<th>Business with a language</th>
<th>Business or Accounting with another subject</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA (Hons) French and Business Management, UCAS Code: RN12</td>
<td>BA (Hons) Business Management and Economics, UCAS Code: NL21</td>
</tr>
<tr>
<td>BA (Hons) German and Business Management, UCAS Code: RN22</td>
<td>BA (Hons) Business Management and Mathematics, UCAS Code: NG21</td>
</tr>
<tr>
<td>BA (Hons) Hispanic Studies and Business Management, UCAS Code: RN42</td>
<td>BA (Hons) Sociology and Business Management, UCAS Code: NL3K</td>
</tr>
<tr>
<td>BA (Hons) Korean Studies and Business Management, UCAS Code: TN42</td>
<td>BA (Hons) Business Management and Economics, UCAS Code: NL41</td>
</tr>
<tr>
<td>BA (Hons) Russian and Business Management, UCAS Code: RN72</td>
<td>BA (Hons) Accounting and Financial Management and Mathematics, UCAS Code: NL41</td>
</tr>
</tbody>
</table>

There’s a 50:50 split between the two subjects. This means that you don’t study Accounting and Financial Management or Business Management in quite as much detail as you would on the single honours courses, and you have fewer optional modules. The advantage is that you get to study two subjects that you love, and develop skills in each.

To find out which modules you’ll study as part of your dual honours course, visit our website.

If you’re unsure about whether a dual honours course is for you, don’t forget there’s still the option to use your unrestricted credits to study another subject.
One of the highlights of my placement was being given the responsibility of opening the first ever M&S Back to School Store. This gave me the opportunity to line manage section managers, recruit and train a new team, and lead store visits with company directors. There was a lot of planning and a very tight timeframe in which to make it happen, but it was a great experience. Since completing my placement, I have secured a graduate job with the company and will join them when I leave University.

Lucy Grimes, BA (Hons) Business Management with Employment Experience, placement year at Marks and Spencer as Trainee Retail Manager

“Getting to live in London for a year and earning a salary was great. My placement year was a really fulfilling experience and I picked up so many valuable skills. I think the experience really helped when I was looking for graduate roles – when I finish my degree I’m going to work for Gattner, the international information technology research and advisory firm, as an Account Manager.”

David Chamberlain, BA (Hons) Business Management with Employment Experience, placement year at Europanel as International Client Assistant

“My placement demanded strong problem solving abilities and the ability to present findings to a range of different audiences, from clients through to senior members of the company. Working in a client facing environment I developed confidence and communication skills. Being able to articulate findings in a clear and concise manner was of the upmost importance and I was able to use these skills when I returned to University for my final year of study. I received the highest grading at Ernst & Young out of the placement students and will re-join the company after graduation to continue my training with them as an Audit Associate.”

Ross Goulder, BA (Hons) Accounting and Financial Management with Employment Experience, placement year at Ernst & Young as Audit Associate
Entry requirements
Standard offers for studying with us are:
A-Level: AAB
BTEC: DDD in a relevant subject
International Baccalaureate: 35
You will also need GCSE Maths grade B or the equivalent.
For more details, visit our website.

Please note: You don’t need to have A-Level Business Studies, but two of your A-Levels must be in acceptable subjects. Some dual honours courses require specific A-Levels. Visit our website to find out more.

International students
To find the entry requirements and grades for your country, see the online prospectus or get in touch.

English language requirements: IELTS 6.5 with a minimum of 6.0 in Reading, Writing and Listening and 5.5 in Speaking or equivalent secure English language test.

Financial support
The University bursary scheme gives cash support to many UK students. We also offer a number of scholarships every year for UK, EU and international students. For details, visit our website.

Open days for offer holders
If we offer you a place on a course we’ll invite you to an open day at the Management School, usually between December and April. It’s a great chance to tour the school, talk to staff and students and find out more about your course. We look forward to meeting you.
