The University Of Sheffield.

Department Of Materials Science & Engineering.

MSc(Eng)
Aerospace Materials
MSc(Eng) Aerospace Materials

Sheffield is in the heartland of the UK aerospace industry, meaning many international aerospace companies look to the Department to discover ways to improve both materials and processes for use in their products.

This course is specifically designed to give students both the breadth and depth in the fundamentals of aerospace materials and how they can be applied to industrial problems – giving you the skills of direct use to a range of employers including Astrium, Siemens Industrial Turbomachinery and Suzhong Zhongmenzi Technology.

“The student life at Sheffield is amazing; the academics go hand in hand with exploring and meeting people from various nations. A balance is struck between work and fun where the University offers various opportunities to discover myself.”

Abirami Priyadarshini Babu — MSc student
