

Sarcoma UK Sarcoma Research Symposium (Basic Science) “What causes Sarcoma?” – 8 September 2016

Sarcoma UK held its first Basic Science Research Day at Burlington House in London.

The event was well attended by members of the Sheffield Sarcoma Research Group. A number of posters were presented by members of the Sheffield group.

There were excellent talks throughout the day and in the latter part of the afternoon a fact finding session was admirably hosted by the Cabinet Office no less.

At the close of the day there was a wine reception where the poster prize was awarded and the Sayako Grace Robinson Studentship launched.
