Applying for a National Teaching Fellowship This Year, Next Year or Sometime

Mick Healey
HE Consultant and Researcher

November 2014
Version 2

Since I was awarded a National Teaching Fellowship (NTF) in 2000, I have often been asked to run workshops on applying for a NTF, mentor applicants and advise universities wanting to increase the number of successful applications. I have summarised below some of the suggestions I have made over the years.

I recognise that there are many different approaches both to applying for a NTF and to supporting potential candidates; applying for a NTF is after all a very personal affair. What I have attempted to do is to distil some general points which potential candidates and universities may find worth considering. They are arranged under three headings:

1. Ten Hints on Increasing your Chance of a Successful Application for a National Teaching Fellowship
2. Ten Things to do to Help Prepare for Applying for a National Teaching Fellowship
3. Ten Ways in which Universities can Support and Develop Applicants for National Teaching Fellowships

Applicants I have mentored and participants at workshops say they have found earlier versions helpful http://www.mickhealey.co.uk/workshops-offered/obtaining-professional-recognition/applying-for-a-national-teaching-fellowship.

I am grateful for the positive feedback provided by colleagues on the SEDA and NTFS lists, when I circulated the first version. I have made a few minor additions. Gina Wisker (Brighton) added some important realism in commenting on the process of putting together an application:

“they think it’ll be easy; it’s very hard. They leave it all too late; it takes a lot of re-writing and close work.”

It is worth noting that submitting an application is a little like submitting a paper to a journal. In both there is an element of chance on who the reviewers are; the two NTF reviewers may like different aspects of the application and, if you are not successful, provide different advice on how it may be improved. If you re-apply, and many do so, your application may not go to the same reviewers, and hence you may receive different feedback! Peer review is a flawed system, but it is difficult to come up with a better one.

I have also added an appendix put together by Rayya Ghul (Canterbury Christ Church University) and myself, which gives a proforma which can be used to provide feedback to potential applicants.

Please email me with additional or alternative suggestions and strategies for helping colleagues strengthen their applications and for universities to build the capacity and confidence of their staff to receive recognition for their teaching excellence.

Details on applying for a NTF in 2015 are available from: https://www.heacademy.ac.uk/professional-recognition/awards/national-teaching-fellowship-scheme-ntfs/ntfs-resources

Good luck!

Ten Hints on Increasing your Chance of a Successful Application for a National Teaching Fellowship (NTF)

November 2014

1. Try to tell an interesting story with an integrating argument. This is best expressed in the first person. Avoid your application reading like an annotated cv; use diagrams where they add value. Imagine writing for three different colleagues, at least one of whom is outside your university and another from a different discipline. This will help you avoid institutional and discipline-specific language and acronyms.

2. Structure the application using the three criteria – individual excellence, raising the profile of excellence, and developing excellence. As the criteria are equally weighted all three sections should be approximately the same length. Where relevant reflect on your whole career and even beyond, including brief reference to activities and experiences outside HE if they contribute to meeting the criteria.

3. Go beyond simply describing what you have achieved, give a rationale and indicate what difference(s) you have made; this is not the place for modesty.

4. Use mostly recent examples, student feedback and evaluations, quotes, statistics, awards, invitations, and references (just name and date e.g. Brown, 2013 – there is not space to give full citations) to evidence your claims. Quotes should chime and relate to the assessment criteria.

5. Ask your colleagues, internal and external to the university, and past students to provide you with quotes. For ethical reasons avoid asking students you are currently teaching, though do consider using quotes from anonymous course evaluations and unsolicited emails. Only use quotes which indicate excellence; good is not good enough! If your institution does not provide you with a mentor(s) ask two or three colleagues, from within and external to your institution, to comment on how you could enhance your application.

6. Show awareness of the scholarship of teaching and learning (SoTL)/pedagogic research in your discipline and generally, which underpins your case for excellence; even better if you have contributed to the literature on teaching and learning.

7. Consider starting with a paragraph which catches the reader’s attention, including a statement about your teaching philosophy, before addressing the first criteria. End with a strong quote about your excellence as a teacher.

8. Treat the application as a whole, including the institutional statement and cv. Avoid using the same evidence or quoting the same people more than once and ensure the application is self-contained. No appendices are allowed and reviewers will not look at web sites or references.

9. The institutional statement should confirm the accuracy of your claim, give context, be effusive and add value e.g. keep some quotes for use there. To ensure alignment and to avoid unnecessary repetition, it would help if you are involved in its drafting.

10. Above all, enjoy reflecting on your career and celebrate that you have achieved so much already. If you are not successful this year, try not to take it too personally and consider applying the following year. Many nominees for NTFs are successful on only the second or third attempt. Remember it is an honour to be nominated by your institution and you should be proud of this and celebrate it whatever the final outcome.

Ten Things to do to Help Prepare for Applying for a National Teaching Fellowship

Mick Healey
HE Consultant and Researcher

November 2014

These suggestions all involve developing the evidence base that meet the three criteria for NTF – individual excellence, raising the profile of excellence, and developing excellence – and can be acted upon one, two or more years before considering putting in an application.

1. Apply for Fellowship of HE Academy under UKPSF – preferably SF or PF levels.

2. Apply for a teaching fellowship or equivalent, if it exists at your institution. It is becoming an expectation that your institution should have recognised your excellence before putting you forward for a NTF.

3. Develop networks of people within your institution, nationally and/or internationally, in the learning and teaching of your discipline/profession and in learning and teaching more generally. This will be helped by engaging in the following activities.

4. Participate in learning and teaching courses, workshops, writing groups, events and conferences in your institution, discipline/profession and/or nationally/internationally. Invite colleagues with interesting ideas to visit your institution to exchange practices and to run learning and teaching sessions. After all this may lead to you being invited back in return!

5. Apply for funding to undertake learning and teaching developmental and/or research projects in your institution, discipline/profession and/or nationally/internationally. Joining others in collaborative bids is a sensible and often necessary approach.

6. Try out innovative practices in your teaching, evaluate them and research into their impact and then give conference papers and workshops within your institution (e.g. at annual learning and teaching conferences), your discipline/professional conferences and/or at general learning and teaching conferences (e.g. HE Academy events).

7. Write and seek publication of reports, papers and chapters on learning and teaching initiatives and projects in which you are engaged; propose editing collections of papers and chapters on learning and teaching in your institution, discipline/profession and/or nationally/internationally.

8. Organise learning and teaching events in your institution, discipline/profession and/or nationally/internationally. Volunteer to join learning and teaching related initiatives and committees in your institution, discipline/profession and/or nationally/internationally; mentor colleagues; referee for learning and teaching journals; review learning and teaching books and resources; seek to join editorial boards of HE journals.

9. Seek feedback from students and colleagues when you undertake learning and teaching sessions, initiatives, workshops, projects, mentorships, advisorships etc and keep a note of these things along with quotes about your excellence. It is easiest to do this immediately after the events rather than several months or years later.

10. Above all do things which you enjoy, don't take on things simply to enhance your evidence base!

Ten Ways in which Universities can Support and Develop Applicants for National Teaching Fellowships

Mick Healey
HE Consultant and Researcher
mhealey@glos.ac.uk; www.mickhealey.co.uk

November 2014

1. Recognise, reward and celebrate ‘excellent’ teaching and learning internally e.g. Institutional Teaching Fellow Scheme; Annual Learning, Teaching and Assessment Institutional and Faculty Conferences; and ensure promotion criteria are explicit about teaching excellence, scholarly teaching and engagement in Scholarship of Teaching and Learning (SoTL). You cannot expect an applicant to receive a national award if they have not first received institutional recognition and awards for their excellence in learning and teaching.

2. Encourage staff to become Fellows under UKPSF scheme whether through direct application to the HE Academy or through accredited procedures; e.g. the University of Reading states that “From 2014-15 the normal expectation will be that the University nominees for the NTFS will be recognised at D3 (or equivalent)” ie Senior Fellowship.

3. Support development of learner-centred approaches (e.g. PGCHE, CPD events, learning communities, reading and writing groups) and teaching and learning innovations. Recognise that most new practices need to be piloted and revised and may not always work well in the first year.

4. Provide opportunities for staff to undertake and publish SoTL/pedagogic research and development projects e.g. provide small grants; run grant bidding workshops and writing retreats.

5. Support colleagues to bid for discipline/professional and nationally/internationally funded SoTL/pedagogic research and development projects and to present at national and international HE Conferences, including engagement with HE Academy networks and events.

6. Develop a culture where staff and students co-design, co-develop and co-investigate teaching and learning practices.

7. Encourage external networking, visiting speakers and fellows; applicants need to be outward facing and making a difference externally as well as internally; NTF applicants need to have at least a national profile.

8. Establish mentoring schemes not just for NTF applicants, but for those who wish to put forward in 2/3+ years’ time.

9. Set quality standards for the above and benchmark practices against other similar institutions.

10. Celebrate all who are nominated, not just those who are successful, and support unsuccessful applicants to build their capacity and experience. Many nominees for NTFs are successful on only the second or third attempt. Some colleagues take lack of success in receiving a teaching award, much more personally than, say, adverse reviewer comments on their research. It is an honour to be chosen to be one of up to three institutional nominees for a NTF and this should be celebrated and added to their CV whatever the final outcome.

Appendix 1: NTFS 2015 Nomination Selection Pro-forma

Name of Assessor: 
Name of Applicant: 

Grade each criterion on a 0-10 scale and make a brief helpful comment addressed to the applicant. Also indicate whether you think the sub-criteria are met or not.

<table>
<thead>
<tr>
<th>Criterion 1</th>
<th>Individual excellence: evidence of enhancing and transforming the student learning experience commensurate with the individual’s context and the opportunities afforded by it.</th>
<th>Met</th>
<th>Not Met</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Clearly demonstrates engagement of students and a transformative impact on their learning</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>The evidence to support this criterion is wide ranging and outstanding</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Clear that the nominees’ teaching is not only informed by pedagogy but that they further shape these theories with their own research</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Demonstrates inclusivity</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Creative</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Grade: 
Comment on strengths and how could be even stronger:

<table>
<thead>
<tr>
<th>Criterion 2</th>
<th>Raising the profile of excellence: evidence of supporting colleagues and influencing support for student learning; demonstrating impact and engagement beyond the nominee’s immediate academic or professional role.</th>
<th>Met</th>
<th>Not Met</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Evidence how they support student learning and influence change not only amongst colleagues within their institution but also nationally and internationally, and even within their local communities</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>The examples are well evidenced and underpinned by scholarship</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>The initiatives they put in place within their institutions are well-developed and evaluated in terms of their impact and disseminated both nationally and internationally through shared practice, education/teaching and learning committees, and at conferences</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Shows leadership and/or influence</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Grade: 
Comment on strengths and how could be even stronger:

---

1 Designed by Rayya Ghul (rayya.ghul@canterbury.ac.uk) and Mick Healey (mhealey@glos.ac.uk)

2 These are unofficial. They come from comments in HEA reports on what assessors are looking for as they read applications and our own views on important aspects associated with successful applications. In an increasingly competitive environment it is expected that successful candidates will meet most, though not necessarily all of them.
<table>
<thead>
<tr>
<th>Criterion 3</th>
<th>Developing excellence: evidence of the nominee’s commitment to her/his ongoing professional development with regard to teaching and learning and/or learning support</th>
<th>Met</th>
<th>Not Met</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Demonstrates a continuous development of personal and professional practice and looks to the future as well as the past, using a wide range of evidence to underpin their claims</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Also links this development to their practice in the classroom/learning environment</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Clearly a critical reflective practitioner</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Demonstrates a breadth and depth of engagement with CPD and often takes advantage of both formal and informal learning and development opportunities</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Grade:
Comment on strengths and how could be even stronger:

<table>
<thead>
<tr>
<th>Overview</th>
<th>Met</th>
<th>Not Met</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tells a consistent and compelling story</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A clear philosophy of teaching and learning comes through the application</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Has at least a national profile in teaching and learning of discipline or generally</td>
<td></td>
<td></td>
</tr>
<tr>
<td>All three sections roughly the same length</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Clear and well-written</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Submission, institutional statement and CV are aligned</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
