De-mystifying data analysis: WRDTP workshops
27th November 2019 ICOSS conference room
09.30 am – 4.15 pm

Feeling unsure about analysing your data?

Three ‘hands-on’ workshops will encourage you to ‘have a go’ at questionnaire, visual images and Q-methodology approaches to data analysis, under guidance.

Experts will introduce you to advanced procedures to help you to: build your skill-set and confidence; select the most appropriate analytical approach; develop critical capacity when reviewing studies and look forward with joy and excitement to analysing your own data!

**Workshop leaders:**
Dr Jessica Bradley, University of Sheffield School of Education (visual images)
Dr Henning Holle, University of Hull Department of Psychology (questionnaires)
Dr Martin Hughes, University of Sheffield School of Education (Q-methodology)

Workshop available in both face-to-face and online formats.
