Sheffield Archaeobotanical Consultancy

We undertake recovery, assessment, analysis and interpretation of a range of botanical materials from archaeological sites in Britain, Europe and the Near East.

Our team of experienced archaeobotanical specialists offer a range of expertise:

- Charred plant remains
- Waterlogged plant remains
- Wood charcoal
- Pollen
- Digital photography & illustration

Sheffield Archaeobotanical Consultancy is based within the Sheffield Centre for Archaeobotany and ancient Land-use in the Department of Archaeology at the University of Sheffield

http://www.shef.ac.uk/archaeology/research/scale

- Dedicated pollen and microscopy laboratories
- Extensive reference collections
- On-site sample processing with equipment hire
- CSCS qualified staff
- Competitive rates

We specialise in rapid, low-cost assessments of large numbers of samples, with recommendations provided for full analysis targeted at those samples most likely to yield results.

The quality of all archaeobotanical work produced is overseen by Prof Glynis Jones and Dr Mike Charles. Primary staff members are Ellen Simmons and Angela Walker. Please contact us for a quote or for further information using the details below.
