

Sheffield Archaeobotanical Consultancy

We undertake recovery, assessment, analysis and interpretation of a range of botanical materials from archaeological sites in Britain, Europe and the Near East.

Our team of experienced archaeobotanical specialists offer a range of expertise:

- Charred plant remains
- Waterlogged plant remains
- Wood charcoal
- Sample processing
- Digital photography

Sheffield Archaeobotanical Consultancy is based within the Sheffield Centre for Archaeobotany and ancient Land-use in the Department of Archaeology at the University of Sheffield

<http://www.shef.ac.uk/archaeology/research/scale>

- Dedicated microscopy laboratory
- Extensive reference collections
- On-site sample processing with equipment hire
- Experienced and qualified staff
- Competitive rates
- Report writing to publication standard

We specialise in rapid, low-cost assessments of large numbers of samples, with recommendations provided for full analysis targeted at those samples most likely to yield results.

The quality of all archaeobotanical work produced is overseen by Prof Glynis Jones. For an informal discussion of the service we can offer please contact Ellen Simmons or Gemma Warham using the details below.
