

# Zooarchaeology Consultancy Service

The University of Sheffield Zooarchaeology Lab undertakes the assessment and analysis of animal bone assemblages from most periods (Upper Palaeolithic to Modern) and all areas of Britain and Europe.

**Our team of experienced zooarchaeologists offers a range of expertise in:**

- Mammals (including micro-mammals)
- Birds
- Fish
- Amphibians and reptiles
- Marine molluscs

## We offer:

- Dedicated laboratories
- An extensive reference collection
- A large zooarchaeology library
- Competitive rates
- > 30 years of experience in commercial and academic zooarchaeology

Our reference collection is arranged by anatomical element and includes mammals, birds, amphibians, reptiles, fishes and molluscs.

The quality of all zooarchaeology work produced is overseen by Professor Umberto Albarella. For an informal discussion of the service we can offer, please contact us using the details below.
